Escape 19' Information

Whether you are a seasoned RVer or just starting out, the Escape 19' comes prepared. Our commitment to quality and customer satisfaction makes the Escape one of the top rated RVs in North America. The US based RV Consumer Group has placed the Escape 19' at the top of the list based on its coach and frame construction, tow ability and resale value. The Escape 19' comes with a full two year warranty and can be viewed in many cities across Canada and the United States or stop in and see an Escape in various stages of production at beautiful Chilliwack, British Columbia.

Two Piece Fiberglass Shell Construction

The 19' Escape represents high quality. The 100% molded fiberglass body is made in a two piece mold. Our fiberglass team bonds the upper and lower halves together before the shell is demolded and bolted to the frame. Anchor blocks are fiberglassed in strategic points inside the trailer to which interior walls and natural oak cabinetry are securely mounted, creating a solid, structurally sound interior/exterior. This solid one-piece fiberglass shell is strong, durable, easy to clean and completely waterproof.

Lightweight & Aerodynamic Design

There are many key features about the Escape which make it lightweight and aerodynamic, keeping travel costs to a minimum. With a dry weight of only 2510lbs, the Escape 19' has been designed specifically for mid sized vehicles such as SUVs and mid-sized trucks with a V6 engine or a minimum towing capacity of 4000lbs.

The aerodynamic design of the Escape 19' includes a low center of gravity for better road stability and low wind resistance or drag when in tow. This combined with the rubber torsion suspension axle not only reduces vibration while traveling but also provides independent suspension and is maintenance free. All of our 14" Goodyear Tires (including the full size spare) are balanced before you pick up your trailer.

Amenities

Don't be fooled by its size. The Escape 19' comes standard not only with an easy and comfortable galley, quality appliances but also sleeping for up to five people and endless storage. The interior is professionally finished with natural oak cabinetry, large windows, high-grade linoleum flooring and a unique insulated vinyl headliner/wall covering.
